Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### **DETAILED ACTION**

### Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-3 and 5-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Doshita et al. (US20020005014A1).

Re claim 1, Doshita et al. discloses a harness protector comprising: a wire harness (86 for example); a harness protector main body (81 for example) for accommodating the wire harness in a curved shape (see figure 13); and a friction member (88 for example) for only temporarily contacting with and holding the wire harness in the protector main body.

Re claim 2, Doshita et al. discloses a harness protector, wherein the friction member abuts resiliently (bending, see page 9 paragraph 129 line 6) on the wire harness (see figure 13).

Re claim 3, Doshita et al. discloses a harness protector, wherein the friction member is formed separately from the protector main body (see figure 13).

Re claim 5, Doshita et al. discloses a harness protector, wherein the harness protector main body includes a base and a cover (see figure 1 for example).

Re claim 6, Doshita et al. discloses a structure for supplying electric power using the harness protector comprising: the harness protector; and a fixed member (2

Page 3

Application/Control Number: 10/615,788

Art Unit: 2831

for example), wherein said harness protector is provided on the sliding member or the fixed member, the wire harness is wired from the harness protector to the sliding member and the fixed member, and the friction member temporarily contacts the wire harness and prevents the wire harness from being removed from the harness protector while the different member is moving (see figure 9 and 13).

Re claim 7, Doshita et al. discloses a spring member (85) for biasing the wire harness in a direction where the wire harness is accommodated, said spring member being provided in the harness protector, wherein the wire harness is pulled out to the maximum at a first moving end of the sliding member to compress the spring member to the maximum, and the friction member is so disposed as not to interfere with a restoring of the spring member while the sliding member moves from the first moving end to a second moving end (see figure 13).

Re claim 8, Doshita et al. discloses a structure wherein the friction member temporarily contacts and holds the wire harness while the sliding member moves from a second moving end to the first moving end (see figures 9 and 13).

Re claim 9, Doshita et al. includes a structure, wherein the sliding member is a sliding door, the fixed member is a vehicle body, and the harness protector is provided on the sliding door vertically (see figure 1).

### Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Application/Control Number: 10/615,788 Page 4

Art Unit: 2831

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

- 4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 5. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Doshita et al.

Re claim 4, Doshita et al. substantially discloses a harness protector as set forth in claim 1 above. Doshita et al. does not explicitly disclose wherein the friction member is formed integrally with the protector main body. It would have been obvious to one having ordinary skill in the art at the time the invention was made to form the friction member integrally with the protection main body, since it has been held that forming in one piece an article which has formerly been formed in two pieces and put together involves only routine skill in the art. *Howard v. Detroit Stove Works*, 150 U.S. 164 (1893).

## Response to Arguments

6. Applicant's arguments with respect to claims 1-9 have been considered but are moot in view of the new ground(s) of rejection.

Application/Control Number: 10/615,788 Page 5

Art Unit: 2831

#### Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jinhee J Lee whose telephone number is 571-272-1977. The examiner can normally be reached on M, T, Th and F at 6:30AM-5PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dean A Reichard can be reached on 571-272-2800 ext. 31. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
